Judge Testing Guide

Upload this PDF to LeaseLens and try the questions below. The questions are intentionally chosen to exercise clause retrieval, contradiction detection, risk explanation, missing-information detection, and evidence linking.

- Which important values are missing from the lease?
- Find every clause containing vague words such as reasonable, appropriate, suitable, or approximately.
- What information is missing from the termination clause?
- Does the document define a deposit refund timeline?
- What is unclear about repairs and maintenance?
- Can LeaseLens identify the missing handover process?
- Which clauses need clarification before the agreement is finalized?

Expected behavior	LeaseLens should quote or locate the relevant clause, explain why it matters, distinguish fact from interpretation, and say when evidence is insufficient.
